localsearch is the leading marketing and advertising partner for Swiss SME.
We make our customers successful in the digital world.

Within our department Products & Platforms we are looking for new colleagues:

Data Integration Engineer

We are
Value-providers, data-informed-engineers, product-developers, service-providers, growth-enablers, passionate **and offer**

- a central role in implementing the ongoing digital transformation of localsearch
- a participation in design, planning, and execution of strategic projects and responsibility for the enterprise integration layer
- being part of a core team spanning the range from system integration to data collection and actionable business insights
- a close collaboration with data engineers, developers, and business analysts

You are
Integration-geek, team-player, architecture-aligner, message-flow-designer, problem-solver **and you impress us with**

- multiple years of experience with data integration and business process integration techniques and tools
- expertise with one or more ESB/API Management platforms (TIBCO, Mulesoft, etc)
- experience working with key concepts and technologies for a cloud-based system integration (microservices architecture, AWS, GCP, Kafka, REST, SOAP, etc)
- knowledge of master data management technologies and methodologies
- appropriate professional experience and education, professional proficiency in English, German is a plus

Important: We are only able to consider applicants with a valid permit to reside and work in Switzerland or citizens of EU-27.

Direct applications are given priority.

We will be happy to answer your questions via our WhatsApp chat +41 79 358 35 76.

We, Sylvia Ramona Bertele and Kurt Baarman, look forward to receiving your online application!
